A Complete Range of Fruit Ripening - Cold Rooms

## Ripening Chambers

Ripening Systems from Blueline Refrigeration are designed to bring down dehydration and improve the appearance, enhance the colour, taste and quality of the product. At Blueline Refrigeration we have been designing projects that are.

- ◆ Energy efficient
- ◆ User Friendly
- ◆ Environmental Friendly
- ◆ Easy to Maintenance
- ◆ Hygienic
- ◆ Safe

Blueline refrigerations have engineered to simulate nature's ripening process without altering the taste or Freshness.

## Cold Rooms

Blueline Refrigeration provide complete solution of cold rooms for Meat & Poultry industry, Sea food industry, Dairy Units, Horticulture & Floriculture Units, Food processing units and large distribution warehouses without suffering any loss of quality, feel, touch, taste or chemical composition of the product.

## Puf Panel Systems

blueline refrigerations puf panel systems are specifically designed to cater all kinds of cold storage applications, Ripening chambers & Clean rooms. The high performance and quality offered by these systems ensures better overlap, weather tightness, corrosion resistance and Low maintenance cost.

## Puff Insulated Doors

Blueline Refrigerations doors are the standard for quality and innovative design. Our doors feature Hygiene, all round sealing, Easy handling & guaranteed long run service.

## Evaporating Units

Blueline Refrigerations Indoor Units are compact with Stainless steel body fitted with copper tubes, aluminum fins, and centrifugal or axial fans, Designed for cold rooms with fresh / frozen goods having room temperature from +20°C to -40°C. Our Indoor Units provide superior Heat Transfer with low noise levels and excellent corrosion resistance.

## Condensing Units

Blueline providing Tecumseh Condensing Units are compact in their design with UV and corrosion resistance and are recognized for their high Efficiency Heat Transfer & Low Power consumption with energy efficient compressors, copper tubes and Aluminum Fins.

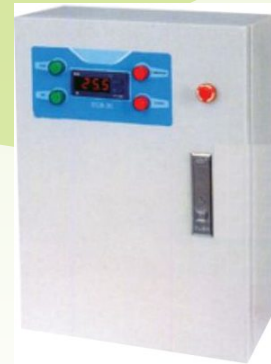

## ETHYLENE GAS SYSTEM

External application of ethylene gas generated from various sources such as ethylene gas cylinders, compressed ethylene gas, ethanol, ethephon, etc., can be used on fruits to trigger the ripening process in fruits. It can be used at a concentration up to 100ppm

# Fruit Ripening System

Ethylene Gas Systems designed by Blueline Refrigeration are ideal for handling sequential ripening situations. Our systems provide a constant and controlled supply of ethylene onto the ripening chambers, by converting specially formulated ripening concentrate in to ethylene.

## Plastic Crates

Manufactured from food-grade polymers, the crates are specially designed for such applications - featuring smooth internal surfaces, perforation for ventilation along with ease of handling and stackability. All this makes them ideal for picking, sorting grading and washing operations.

The global boom and a quality conscious automobile sector have thrown up promising opportunities for the Company. The Division offers tailor-made solutions like fabricated crates incorporating HDPE, PP and EPE sheets, as well as those that innovatively integrate special fabrics for protection against shocks, vibrations and humidity.

- Plastic crates are best Material Handling Product
- Plastic crates offer wider variety of designs.
- Plastic crates appearance is smoother, cleaner. This offers the ability to sell out of the crate without the need to transfer onto shelves
- Plastic crates are lighter and are safer to handle comparatively to wooden products. Lower weight of Plastic crates decreases worker compensation and insurance costs associated with back injuries from lifting crates.
- Plastic crates are strong and durable. Plastic crates can withstand deep freezing conditions as well as open and extreme sun conditions.
- Plastic crates have been available on the market for about 15 years. In recent years, plastic crates have gained significant market presence and continues to grow.

# FIRST IN INDIA INTRODUCING

# SOLAR Ripening Chamber

We are one of the leader of market, engaged in offering a wide range of Banana Ripening Chamber. Our offered Ripening Chamber is widely used to store fruits to keep them fresh and hygienic.

Established in the year 1999 We Blue Line Refrigeration are the leading manufacturer of Ripening Chamber and Insulation Panel. Our product range comprises of Cold Room System, Walk In Cold Room and Storage Freezer. With a combined expertise of over twenty years, professional team provides state-of-the-art, customized solutions for Cold Storage. We Insulated above 4000 chambers all over India

From needs assessment, product advice, installation of customized cold rooms to superior on-time After-sales Service. We provides complete end-to-end services, drawing upon our expertise and extensive domain knowledge. Each client is special as each business has special and unique needs in fact our firm belief.

**"Now we are introducing COLD ROOMS WITH SOLAR POWER"**

## ABOUT US

Bluline Refrigeration is a complete range of solution provider for Ripening Chambers Pre-cooling chambers, Cold Rooms, Industrial Chillers, etc various Refrigeration products. Which are customized as per the specifications of the clients and are supplied at industry leading prices through constant market research, product development and customer interpretation our aim is to continually adapt, develop and improve our technologies and services to ensure our customers are at the forefront of environmentally friendly and efficient construction solutions.

## WARRANTY & SERVICE

Bluline Refrigeration provide warranty for one year with free of cost services for the refrigeration units. Repair / replace the components when necessary within the warranty period. After the warranty period we offer a range of maintenance contracts.

ISO 9001:2008 Certified Company

Associate Sales & Service:
